

## Project Demo Planning

|                      |                                 |
|----------------------|---------------------------------|
| <b>Date</b>          | 15 July 2026                    |
| <b>Team ID</b>       | SWTID-2026-6893                 |
| <b>Project Name</b>  | Credit card Approval Prediction |
| <b>Maximum Marks</b> | 1 Mark                          |

### Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

| S.No | Demo Section                | Description                                                                                                 | Duration (mins) | Responsible Member   |
|------|-----------------------------|-------------------------------------------------------------------------------------------------------------|-----------------|----------------------|
| 1    | Project Introduction        | Introduce the project, problem statement, objectives, and overall workflow.                                 | 2               | Najiya Sanober Shaik |
| 2    | Dataset & Model Development | Explain the dataset, preprocessing, feature engineering, Random Forest model, and evaluation metrics.       | 4               | Abdul Gafoor         |
| 3    | Application Demonstration   | Demonstrate the Flask application by entering applicant details and showing approval/rejection predictions. | 5               | Najiya Sanober Shaik |
| 4    | Project Architecture        | Explain the system architecture, DFD, technology stack, folder structure, and application flow.             | 3               | Kamani Gopinath      |
| 5    | Results & Performance       | Present model accuracy, confusion matrix, ROC-AUC score, feature importance, and testing results.           | 3               | Najiya Sanober Shaik |
| 6    | Conclusion & Q&A            | Summarize the project, discuss future enhancements, and answer questions from the evaluators.               | 3               | All Team Members     |

### Flow Summary: Summary:

| Step | Activity                                    | Notes                                                                                                           |
|------|---------------------------------------------|-----------------------------------------------------------------------------------------------------------------|
| 1    | <b>Introduction &amp; Problem Statement</b> | Introduce the project, explain the need for automating credit card approval, objectives, and expected benefits. |
| 2    | <b>Solution Overview</b>                    | Explain the dataset, preprocessing, Random Forest model, Flask application architecture, and overall workflow.  |

|          |                                   |                                                                                                                                           |
|----------|-----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| <b>3</b> | <b>Live Feature Demonstration</b> | Demonstrate the application by entering applicant details and showing the prediction result (Approved/Rejected), along with key features. |
| <b>4</b> | <b>Q&amp;A Session</b>            | Answer questions related to the model, evaluation metrics, implementation, deployment, and future enhancements.                           |
